## **DETAILED ACTION**

## Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a method for generating a time values based on delay values according to the measured satellite drift history over a predetermined time, classified in class 244, subclass 171.
- II. Claims 13 and 19, drawn to a method for counting a calculating number of symbols from a corresponding designated reference value in order to generating transmitting and receiving timing, classified in class 370, subclass 252.
- III. Claims 14-18, drawn to a method for generating a timing values by calculating a satellite range change based on the recorded delay values to compensating a satellite drift, classified in class 342, subclass 357.17.
- IV. Claims 20-22 and 25, drawn to a system for generating timing values considering the daily inclination change due or a daily delay value change for receiving and transmitted signal to a satellite drift, classified in class 342, subclass 357.12.
- V. Claims 23-24, drawn to a system comprising a first counter to measuring a receive delay value for using to generate a receiving control timing and a second counter for measure a transmitting delay time for using to generate transmitting control timing and first latch for recording the measured receive delay and a second lath to record the measured transmit delay, classified in class 370, subclass 411.

The inventions are distinct, each from the other because of the following reasons:

Application/Control Number: 09/811,885 Page 3

Art Unit: 2665

2. Inventions I, II, III, IV and V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because group I does not includes group II, III, IV and V. The subcombination has separate utility such as Group II has the counters, Group III has satellite range change for compensating satellite drift; Group IV has daily inclination or delay value change according to drift of the satellite; Group V has first and second counters and first and second latches.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, IV and V etc, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 09/811,885 Page 4

Art Unit: 2665

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven HD Nguyen whose telephone number is (571) 272-3159. The examiner can normally be reached on 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Huy D Vu can be reached on (571) 272-3155. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
